

Testing day survey

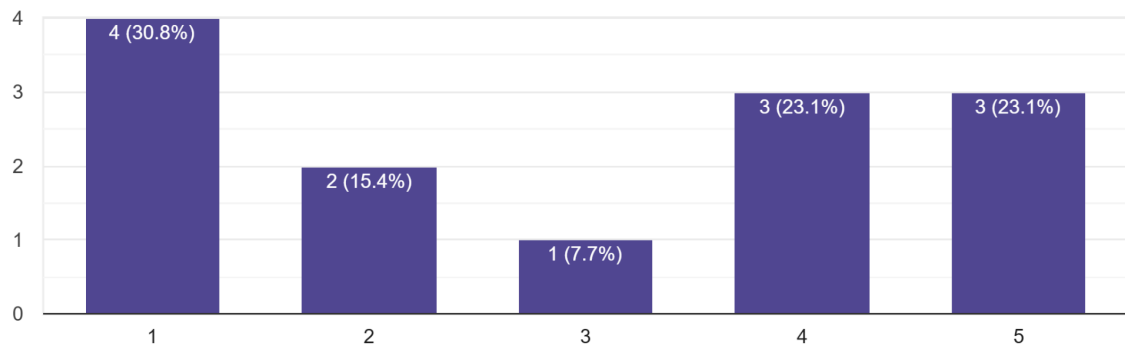

On a scale to 1-5, how easy was it to view events?

13 responses

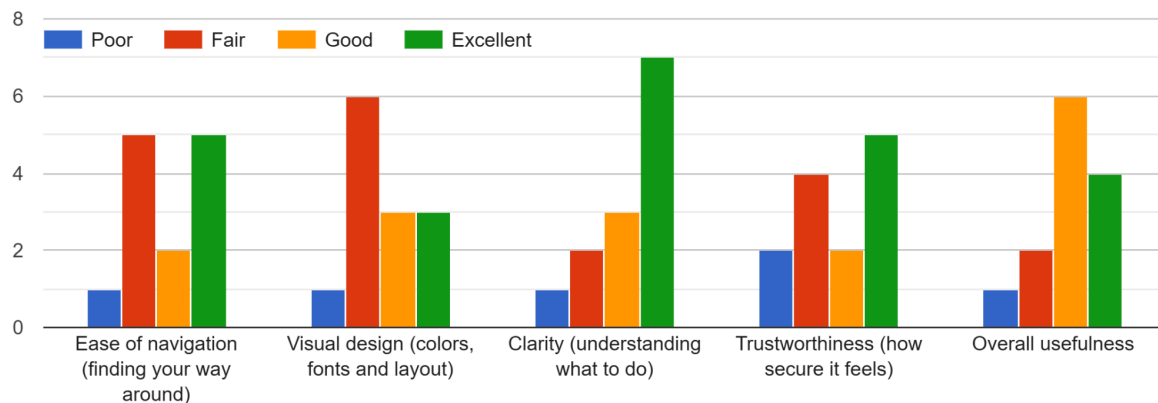

On a scale to 1-5, how easy was it to create events?

13 responses

Please rate the following aspects:

What did you find was good? (e.g., specific feature, design, certain button)

- **Ease of Use & Intuition:** Creating events was straightforward, very intuitive, and easy, with a simple and clear procedure, including the email verification process.
- **Design & Visuals:** The overall design, including the event creation form, was good, and respondents liked the map view/visualiser and the clear buttons.
- **Key Features:** The map feature, account section, and event creation functionality were positively received, along with the event details.
- **Navigation:** Navigation through the application was found to be easy.
- **Project Vision:** The vision for how the project would work was very clear, even with the map not fully functional.

What would you like to see improved or changed?

- **User Interface (UI) Consistency and Design:** Suggestions include a need for consistent UI across webpages, a nicer overall look, consistent home menu design with button UI, and improved clarity in time/date entry during setup.
- **Map Functionality and Events:** Respondents want an interactive map, the ability to zoom in/out and move the map, a working map with detailed event locations, and smaller markers that show whose event it is. There is also a request to see upcoming events for future days.
- **Visuals and Display:** Requests for visual improvements, the implementation of a Dark mode, and displaying only buttons for fully fleshed-out pages were mentioned.
- **User Experience and Features:** Improvements requested include ensuring the correct host email is shown when creating an event, a login button change when logged in, and the addition of a user manual/tutorial or default/placeholder events.
- **Location Fixes:** There is a request to fix the location functionality.

Do you see yourself using this app in the future?
